

Lantern One IDE Status Receipt

Generated: 2026-05-30T02:28:14.1471149Z

Mode: read-only preflight.

Boundary

- No reset, clean, sync, force-push, dispatch, wallet action, trade execution, or private-data mutation happened in this receipt.
- Local repo state, live health URLs, actual MCP tool state, and dirty worktrees override cached status.
- Cloud URLs remain untrusted until root, health, and mirror checks pass.

Summary

Surface	Result
Lantern repo	Dirty on `master...origin/master`, dirty count 26 before focused staging.
HFF scan repo	Clean on `codex/plan-safe-multicoins-mining`.
Orchestrator repo	Dirty on `master...origin/p0/four-agent-fleet-baseline`, dirty count 6.
Local services	`gpt-web-api`, `dashboard`, `lantern`, and `mcp` health checks passed.
Ngrok	No health URL configured; tunnel is not trusted from this receipt.
MCP connector	`ready_tools_visible`; advertised-vs-actual must still be checked before dispatch.
Agent worktrees	14 found; 3 dirty.
Failed services	0.
Convergence loop	Passed repo invariant loop after read-only `safe.directory` retry; source repos remain dirty and must not be reset or moved.
Kalshi lane	5,000 public markets refreshed; paper-ticket queue emitted; live authenticated orders remain blocked.
Bounty lane	Public puzzle/math bounty radar added; ARC-AGI-3 plus ARC Paper Prize ranked first.

Current Recommendation

Hold mutation and reconcile dirty worktrees in the One IDE board first.

Receipts

Artifact	Path
JSON receipt	`manifests/validation/ONE-IDE-STATUS-LATEST.json`
Baseline model	`data/baseline-model/v1.json`
Baseline report	`manifests/LANTERN-BASELINE-MODEL-v1.md`
Kalshi stats report	`reports/KALSHI-KOFI-WATCHLIST-REVENUE-REPORT.md`
Kalshi paper tickets	`data/kalshi/kalshi-paper-trade-tickets-latest.json`
Public bounty radar	`manifests/evidence/public-puzzle-math-bounty-radar-2026-05-30.md`

Human Approval Gates

- Agent dispatch remains held while dirty worktrees exist.
- Kalshi output remains research-only with executable trade recommendations at 0.
- AWS/cloud route remains held until a verified AWS service URL passes root and health checks.
- Bounty output remains research-only until official contest submission and prize authority acceptance.
